DETAILED ACTION

Election of Species

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1) a main embodiment depicted in Fig. 1, having an elongate rod-shaped carrier and performing measurement along a flat track

2) an alternative embodiment of the carrier unit [first described on page 20, ¶0080 and depicted in Fig. 8]

3) an alternative embodiment for length measurement along a curve [first described on page 20, ¶0078 and depicted in Fig. 9]

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

- 1) 1-9
- 2) 10
- 3) 12

The following claims are generic: none

Claim 10 appears improper, as it does not use the carrier unit recited in claim 1.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the first and second species describe different carrier unit structures, while the third species describes a measurement procedure using a circular shape instead of a flat track.

Drawings

The drawings are objected to because Figure 7 includes German language words, such as "hochauflösende," that have not been translated into English.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

Page 2, ¶0006: Change "magnetic quantity" to -- magnetic length --.

Page 2, ¶0007: Change "unsymmetrical" to -- asymmetric --.

Page 13, ¶0049: Change "EPROM-stored" to -- EEPROM-stored --.

Page 20, ¶0079: Clarify the phrase "such that 2° is greater."

Appropriate correction is required.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

Claims 1, 4, 5, and 10 are objected to because of the following informalities:

Claim 1, line 2: Delete "the object is achieved by providing a device."

Claim 1, line 10: Delete "preferably." See MPEP 2173.05(d).

Claim 1, line 11: Change "is" to -- are --.

Lines 16-31 of claim 1 are redundant, repeating limitations found in lines 1-15.

Claim 4, line 3: Change "plus 1" to -- plus one bit --.

Art Unit: 2819

Claim 5, line 3: Change "is" to -- are --.

Claim 10: The carrier sleeve of claim 10 isn't equal to the claim 1 rod.

Appropriate correction is required.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The European Search Report listed GB 2,126,444 to Johnston and EP 0,378,351 to Roberts et al as "X" references. The examiner has underlined and marked pertinent sections of these documents.
